DETAILED ACTION

This action is in response to the reply submitted by the applicant on October 24, 2005. The applicant's reply was in response to a non-final rejection mailed on July 22, 2005 by a previous examiner.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to a method for designing wiring in a multilayered substrate, classified in class 716, subclass 13.
 - II. Claims 19-30, drawn to an electronic structure, classified in class 174, subclass 254.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process. The product does not need the step of providing initial wiring design or altering the initial wiring design. The product can be made with predetermined parameters.

Art Unit: 2841

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Jack P. Friedman (Reg. 44,688) on January 12, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made (see interview summary).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
